# What is NLP?

---

## **Neuro-Linguistic Programming**

### **“Neuro-”**

**The neurological system controls the functions of your body**

### **“Linguistic”**

**The language we use determines how we communicate**

### **“Programming”**

**Describes what kind of models of our world we create**

**NLP describes the dynamics and interactions between the three systems**

## What is NLP?

---

### **Neuro-Linguistic Programming**

**NLP is based on two fundamental presuppositions:**

**“The Map is Not the Territory.”**

**The world you live in and your personal representation of the world are two completely different things – everybody has his own “map” (representation) of the world.**

**“Life and 'Mind' are Systemic Processes.”**

**The ways you behave, interact with others or think are systemic processes – human beings interacting with each other form systems and sub-systems that influence each other.**

## What is NLP?

---

### **Neuro-Linguistic Programming**

**NLP offers a set of tools and trainings that try to help you to be able to view the world from different positions and perspectives.**

**Since NLP believes that nobody is able to create a “correct” or “right” map of the real world – NLP tries to be as objective as possible making it a great tool for improving your communication skills.**

## Where can i use NLP?

---

**NLP is of use in many different areas:**

**Counseling, psychotherapy, education, health, creativity,  
law, management, sales, leadership or parenting.**

## How can I learn NLP?

---

**The vocational training of NLP is split into 3 Levels:**

**NLP-Practitioner (NLP Basics)**

**NLP-Master-Practitioner (Advanced NLP-Techniques)**

**NLP-Trainer (Special techniques for training / presentation)**
